

ZYVORAI LABS · CUSTOMER DOCUMENTATION

Zyvor Janus

Admin Basics

2026-08-29

Ports

Service	Default	Notes
Next.js UI	3000	UI_PORT
FastAPI	8080	API_PORT ; health GET /api/health
CLI	n/a	Local zyvor-janus-cli process

Start together: ./scripts/run_web_dashboard.sh (API binds 0.0.0.0 by default in run_web_api.sh).

Auth (web console)

Env	Default	Purpose
ZYVOR_JANUS_DASHBOARD_USER	Admin	Login username
ZYVOR_JANUS_DASHBOARD_PASSWORD	Admin@321	Login password
ZYVOR_JANUS_AUTH_SECRET	(password)	HMAC for session cookies

Sessions are httpOnly cookies ($\approx$ 7-day expiry). Change defaults before any shared host.

Operate from the console (admin)

1. Confirm `http://<host>:8080/api/health` then open `http://<host>:3000` .
2. Sign in → Dashboard Run smoke test with `small_h100.yaml` .
3. Restrict config file permissions; follow upstream `SECURITY.md` .
4. Packaged systemd units when available — `journalctl -u <unit> -f` .
